BACKGROUND

The National Development Agency (NDA) is a Schedule 3A, Public entity, as prescribed by the PFMA Act of 1999. The Agency was established through the National Development Act of 1998, as amended. The NDA Act requires the NDA in Section 3 (2) (b) to: "Undertake research and publications aimed at providing the basis for development policy." Research undertaken by the Agency is for purposes of promoting, debating, consultation, dialogue and sharing of development experience between civil society organizations and relevant organs of state on development policy.

The NDA is an Agency of government mandated by the National Development Agency Act 108 of 1998 to promote an appropriate and sustainable partnership between the Government and civil society organisations in order to eradicate poverty and its causes. According to NDA (2017), since its inception and full operation in 2000, the Agency set out its agenda to focus on implementing developmental projects that support Civil Society Organisations (CSOs) to eradicate poverty and strengthen the institutional capacity of CSOs to provide quality services to the poor. In addition, to address challenges of poverty the NDA works closely with civil society organisations that operate in impoverished communities on programmes and endeavours in ways that contribute towards the eradication of poverty in South Africa. The agency does this through grant funding and capacity building of civil society organisations (CSO's) that work to address the causes of poverty, inclusive of cooperatives.

The purpose of this research is to identify the role, contribution and challenges faced by Cooperatives in revitalising effective and sustainable economic activities in response to the government economic reconstruction and recovery plan initiatives as a response to the negative effect of COVID-19. The research must also inform government, business and civil society on how to frame economic policies that would ignite and increase economic growth through well-structured cooperative efforts post COVID-19 pandemic period in South Africa.

1.1 Constitutional Mandates

The NDA strategic intentions and objectives are guided by the requirements of Chapter 2 of the Constitution of the Republic of South Africa. Chapter 2 of the Constitution outlines the Bill of Rights, which sets out the fundamental rights of all South Africans, including the right to dignity and the right to equality. The Bill of Rights also states when rights may be limited. The NDA-legislated mandate requires the NDA to contribute towards poverty eradication and

its causes, thus responding to the Bill of Rights to affirm the rights to health care, food, water, social security, children and education rights.

1.2 Policy Mandate

The National Development Plan (NDP); the Medium-Term Strategic Framework (MTSF); Sector Plans and the United Nations Sustainable Development Goals (SDGs) guide the NDA's functions. The aim of the NDP is in line with the NDA's mandate. The NDP aims to reduce inequality and eliminate poverty by 2030. The NDP is grounded on six (6) pillars, which outlines objectives to be achieved by 2030 and the intended outcomes.

From the 13 outcomes, the NDA contributes towards seven (7):

- Outcome 1: Economy and Employment
- Outcome 4: Inclusive rural economy
- Outcome 7: Improving education, training and innovation
- Outcome 9: Social protection
- Outcome 11: Building a capable and developmental state
- Outcome 12: Fighting corruption
- Outcome 13: Nation-building and social cohesion

1.3 NDA Legislative Mandate

The NDA's mandate is derived from the National Development Agency Act, 1988 (Act No. 108 of 1998). In terms of the Act, the primary objective of the NDA is to contribute towards the eradication of poverty and its causes by granting funds to CSOs for the purposes of:

- (a) Carrying out projects or programmes aimed at meeting the development needs of poor communities; and
- (b) Strengthening the institutional capacity of other CSOs involved in direct service provision to poor communities.

The secondary objects of the NDA in terms of the Act are-

- (a) to promote-
- (i) consultation, dialogue and sharing of development experience between CSOs and relevant organs of State; and
- (ii) debate on policy development

(b) to undertake research and publication aimed at providing the basis for development policy.

2. CONTEXT

The secondary mandate of the NDA is conducting research and evaluation studies which are used as engagement tools between organs of state, civil society and the private sectors on debates to improve and enhance South African development policy landscape. Moreover, the outputs are used to inform program planning, implementation and management of NDA development Programs. The research and evaluation approaches and methodologies must be sound and credible for all the role players in the development policy discourse to rely on them in making policy decisions.

The Coronavirus outbreak has created an unpredictable crisis for South African citizens, businesses and society all over the country inclusive of cooperatives. The coronavirus pandemic is causing extensive loss of life and severe human suffering locally and globally. The coronavirus is a public health crisis, which caused a major economic, financial, social shock in the country. Cooperatives are community-based businesses with a dual nature: business enterprises on the one hand, and membership- based associations organised for collective action on the other. The situation that the country is currently facing is of concern for the development and economical contribution of cooperatives. The pandemic has affected the country and the pandemic has led governments to adopt measures shutting down some of the economic activities. The lockdown has affected mainstream economic divers such as tourism, travel, hospitality, entertainment and manufacturing industries. However, the situation calls for re-purposing the approach towards cooperatives to be active, taking action at all levels of the South African economy, local, national and international.

The President of the Republic of South Africa, announced the South African economic reconstruction and recovery plan as the country moved to level 1 of the COVID-19 state of emergency. He stated that in "in adversity so often comes opportunity. South Africa is now on the threshold of an important opportunity to imaginatively, and with a unity of purpose, reshape its economic landscape. The current conjuncture presents an opportunity to reset the South African economy. It is an opportunity to build a new, inclusive economy that benefits all South Africans. This is a moment for a permanent and decisive break with our past of low and declining growth, falling per capita incomes, low investment, as well as high and deeply entrenched levels of inequality, poverty and unemployment". Cooperatives can play a meaning role in creating sustainable opportunities to re-shape the South African economy landscape.

As cooperatives are part of enterprises and operate as small businesses in South Africa, they are known to normally face difficult times more than large companies because they tend to be more vulnerable to economic shocks due to lack of access to resources to adapt to a rapidly changing environment. It is evident that COVID-19 has had an impact on cooperatives and other business as there has been an increase in unemployment, retrenchments and companies closing businesses. Cooperatives are and properly assess the social and economic impact within the cooperative movement.

Cooperatives are a type of business that can be considered unique in a way that they foster social cohesion as they largely depend on trust between members. These businesses are currently facing several challenges such cash flow, a notable decrease of activities caused by the restrictions on movement put in place under the lockdown regulations, loss of incomes in line with these restrictions in various sectors. There are also some human resource constraints with employees at risk, especially those providing care services or working with consumers and cooperatives in agriculture, they experience interrupted flow of goods for their members and citizens. Furthermore, there is uncertainty regarding the future of employment in cooperatives as other businesses have already started retrenching employees.

It has been highlighted that there are several ways the coronavirus pandemic has affected the South African economy especially profit-making businesses inclusive of cooperative and their operations such as supply and demand. On the supply side, companies experience a reduction in the supply of labour, as workers are unwell or need to look after children or other dependents while schools are closed and the movement of people is restricted. Measures to contain the disease by lockdowns and quarantines lead to further and more severe drops in capacity utilization. Furthermore, the supply chain is interrupted leading to shortages of resources and goods.

3. PURPOSE AND KEY RESEARCH QUESTIONS

In the context of the above background, the purpose of this work is to conduct a research study on role and contribution of cooperatives during and post COVID-19 as a vehicle to jump-start and integrate the South African economic landscape to ensure sustainability and create more jobs for low-income population, thus drastically reducing unemployment.

The key research questions that the research must answer includes, but not limited to, are:

- i. What role and contributions has the cooperative sector made towards economic recovery and reform during COVID-19 period?
- ii. What are the main impediments for cooperatives to compete in the South African economy at legislative, policy and strategic approach levels during Covid-19 and lockdown regulations which are likely to continue post COVID-19 period if not addressed?
- iii. To what extent have these impediments affected cooperatives operations/livelihood and existence during the COVID-19 period?
- iv. What mechanisms should be put in place to strengthen the role of cooperatives as one of the main drivers of economic recovery and reconstruction plan in South Africa?
- v. What are the lessons learned by cooperatives, private sector and government in responding to the COVID-19 pandemic?
- vi. What role has government and private sectors play in supporting cooperatives in restoring the economy?
- vii. What are the recommendations from the research findings that can build a sustainable, resilient and inclusive economy?

The research findings will be used to inform platforms for engagement between the state, especially, the Department of Small Business, Department of Trade & Industry, Department of Economic Planning, leaders and structures of the Cooperatives movement in South Africa, Leaders and structures of the civil society, resulting in the development of appropriate policies, legislative frameworks, strategies and programmes to enhance the cooperatives sector capabilities to respond to its mandates and national mandate on development.

To promote debates and engagements between the civil society sector, government and private sector on responsive and effective operations and sustainability for the sector to contribute towards increasing economic participation of South Africans in the economic recovery plan. The specific objectives of the research are to:

i. Understand the role and contributions by the cooperative sector towards economic recovery and reform during COVID-19 period.

- iv. Identify mechanisms in strengthening the role of cooperatives as one of the main drivers of economic recovery and reconstruction plan in South Africa.
- v. Document and share the lessons learned by cooperatives, private sector and government in responding to the COVID-19 pandemic?
- vi. Understand the role of government and private sectors in supporting cooperatives towards restoring the economy?

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
